

Earn a Harvard MPH in Nutrition

Acquire skills in nutrition practice, policy, and communication along with foundational knowledge in nutritional science, epidemiology, and public health.

The Harvard T.H. Chan School of Public Health now offers a Master of Public Health degree that explores the role nutrition plays in the health and well-being of the worlds' populations from a variety of vantage points; recognizing the vast array of influences on diet, nutrition, and health—including environmental, socioeconomic, political, and cultural factors.

Core coursework emphasizes methodological strategies to develop, analyze, and evaluate interventions, programs, and policies typically used in public health nutrition. Students may also choose from a variety of electives tailored to personal career goals and interests such as nutrition policy, health disparities, nutrition epidemiology, global health, social and behavioral sciences, and sustainability.

The 65-credit program is 1.5 years (3 semesters) in length, beginning in September and ending in December of the following year. The summer session features a unique practicum experience allowing students to create a project with real-world application.
