

**Richard A. Cohen, M.D.**

Richard A. Cohen, M.D., Professor of Medicine, Physiology, and Pharmacology, is the first occupant of the Jay and Louise Coffman Professorship of Vascular Medicine at Boston University School of Medicine, having pursued interests in the pathophysiology of vascular disease since his clinical fellowship in Vascular Medicine in 1978 at the then-University Hospital, Boston. He directs the Vascular Biology Unit of the Department of Medicine, where studies on nitrotyrosine and thiol metabolism relating to the aims of the Cardiovascular Proteomics Center are carried out. Dr. Cohen obtained his undergraduate degree in chemistry from Bowdoin College, Brunswick, Maine and his medical degree from Johns Hopkins School of Medicine, Baltimore. He received Clinician Scientist and Established Investigator awards from the American Heart Association and is a member of the American Society for Clinical Investigation, the American Association of Physicians, the Executive Committee of the AHA Council on Circulation, the editorial board of *American Journal of Physiology: Heart and Circulatory*, the NIH Experimental Cardiovascular Science Study Section, and is a permanent member of the NIH/NHLBI Reviewer's Reserve.
