Treisman, M.D.**

Describe the history of the current epidemic of opioid use in the United States. Name factors that helped start and maintain the current epidemic. List consequences of the current epidemic of opioid overuse. Outline suggested responses to the opioid crisis including multi-industry collaboration.

10:20am Public Health Strategy and Response to the Opioid Epidemic in NYC**Hillary Kunins, M.D., M.P.H., M.S.**

Identify trends in opioid overdose in NYC, including the impact of fentanyl. Define public health principles in response to the opioid epidemic. Identify state and local health department and healthcare partnerships to address the opioid crisis in NYC. Describe the role of naloxone in preventing fatal overdose at a population level. Describe the role of medications (methadone and buprenorphine) in reversing the opioid epidemic.

11:10am Collaborative Treatments that Work and the Neurobiology Behind Them**Petros Levounis, M.D., M.A., M.S.**

Discuss the basic elements of drive and cognition in the neurobiology of addiction. List three safe and effective psychosocial interventions for the treatment of opioid use disorders. Discuss the link between interoception and mindfulness. Discuss clinical collaboration and team-based best practice in opioid treatment.

12:00pm Panel Discussion: Interprofessional Perspectives on the Current Opioid Crisis**Panelists: Dr. Glenn J. Treisman / Dr. Hillary Kunins / Dr. Petros Levounis**

Discuss various recommendations for strengthening collaborative efforts to combat the opioid epidemic. List the four foundational pillars to help slow and stop this epidemic including limiting the supply of opioids, raising awareness of addiction risk, identification and management of dependence, and treatment of opioid addiction.

12:30pm LUNCH BREAK**1:30pm Preventing Chronic Pain or Alternatives to Chronic Opioid Therapy****Michael R. Clark, M.D., M.P.H., M.B.A.**

Identify risk factors / formulations of chronic pain. Describe a patient-centered approach to the formulation of the patient with acute pain. Describe rational treatment approaches to reduce the risk of developing chronic pain. Describe the critical importance of a team-based approach to effectively treat the pain patient.

2:15pm A Key to the Solution is a Scientific Revolution in Addiction Treatment: From Disease Concept to Psychobiosocial Process; From Abstinence-Only to Integrative Harm Reduction Treatment**Andrew Tatarsky, Ph.D.**

Describe four basic harm reduction principles. Identify four harm reduction engagement skills. Describe the importance of managing "social" countertransference as essential to building the alliance. Define the psychobiosocial process model of SUDs as reflecting an interaction of psychological, biological and social factors that are unique to each person. Identify challenges and recommendations for bridging the professional divide and strengthening collaboration between abstinence-only and harm reduction communities.

3:00pm Community Engagement to Address Opioid Use Disorder**Laura Palombi, Pharm.D., M.P.H., M.A.T., AE-C**

Describe the benefits of interprofessional community coalitions in mobilizing against opioid use disorder. Explain the goals of treatment courts and key components of drug courts in addressing opioid use disorder. Describe multiple methods of engaging with health care systems and health care professionals to improve care for patients with opioid use disorder.

3:45pm New Trends in Substance Use in the Current Public Health Crisis: Keys to Engaging the Active Substance User**Steve Chassman, L.C.S.W., C.A.S.A.C.**

Identify current trends in drug use. Identify evidence-based practices for engaging young people including Motivational Interviewing and Stages of Change. Describe ways to motivate adolescence and tips for working with people who use. Describe the importance of educating clients, family, community and other healthcare professionals specific to trending drugs of use, drug addiction, treatment and related support resources. Describe the importance of collaboration across healthcare and other professions in decreasing the harmful effects of drug addiction and overdoses, and improving overall health outcomes.
