

E-Value PxDx (Pt Log) Student Guide for PA Program

Add New

About

The **PxDx** tool is assigned to individuals who are expected to log Procedures and/or Diagnoses during their educational experience. The fields that you are required to log are defined by an E*Value administrator.

Tip: You may log entries into this tool on-the-go using a mobile phone or device – at no additional cost. Log into E*Value (<u>www.e-value.net</u> – you do not need an "inst" code) using a phone or mobile device to utilize the mobile interface.

Logging

Tip: If you prefer to enter information entirely via the keyboard, you may advance through the fields using the Tab key. Buttons can be clicked by tabbing to the button and clicking the Space bar.

Main

Interaction Date *
11/01/2013
Age *
◎ Infant <1 year ◎ 1-2 Years Old ◎ 3-17 Years of Age ◎ 18-64 Years of Age ◎ 65 of Older

- **Group:** If your program has created **Procedure Groups**, you can filter the list of procedures by selecting the Procedure Group from the list to the right of the procedures list, as shown in the example above. Alternatively, you may filter for all un-grouped procedures.
- **Procedure:** Select the procedure or procedures for this interaction from the list. You can enter all or part of the procedure name in the **Filter** text field to filter the list. You can select multiple procedures by holding the "CTRL" button while you select your procedures.
- Select your role in the procedure: Since this is determined on the previous screen this has been set to a default of N/A
- Select the **Add Procedure** button to add the selected procedures.
- The interaction will be added to the table below. Use the **Remove** icon to delete the interaction. Use the **Move** icon to indicate the primacy of the interaction.

Tip: Click the **Save as Template** button to save commonly-used responses for future entries. You may save multiple templates.

	Next				
Save Cancel Save as Template * Required for Diagnoses Only * Required for Procedures Only * Required for Both			Templates can be saved to quickly load responses that typically do not change from entry to entry.
