Why choose BU—top 10 reasons

10. Research: We are nationally recognized for research programs in neuroscience, cancer, and infectious disease.

9. Programs: We offer many one-of-a-kind degree programs and concentrations uniquely based at Boston University School of Medicine.

8. Service: Our students engage in personal and professional enrichment activities through campus-based social action initiatives and community organizations.

7. Professional Development: Our students build proficiencies and professionalism through exposure to seminars, elective courses, conferences and special events such as “student achievement day”.

6. Boston: Our college-oriented city is an academic hub, and offers rich and diverse cultural, intellectual and recreational experiences for graduate students.

5. Community: Our medical campus enables shared learning with like-minded students.

4. Careers: Our students are encouraged to build scientific knowledge and soft skills (especially communication and collegiality) to become leaders in their fields.

3. Degree: Graduates of our programs are awarded their M.A., M.S. or Ph.D. degree by Boston University’s School of Medicine, one of the top research schools in the United States.

2. Networking: Our students have a unique opportunity to build professional networks with faculty who have significant research and publication experience, and who can assist with career development.

#1 reason

1. Professional Success: Our graduates are motivated, lifelong learners, who are prepared for challenging positions in a competitive and fast-paced global environment.
