Of Science and Strategy Seminar synopsis:

Of Science and Strategy Seminars will move you from tactical, or day-to-day thinking, to strategic thinking. The seminar discusses the importance of defining your professional purpose, then demonstrates how to transform your life so it is completely aligned with that purpose and how to fulfill that purpose in the face of adversity. The seminar is built around cutting edge science in the fields of psychology, physiology and motivational theory as well as Dr Hankel’s first hand experiences in academia, medicine, business and entrepreneurship. He will show students how to transform their vision into a conviction, break the 10,000 hour law of mastery and how to avoid willpower depletion. He also will show students the only 3 professional skills that will matter in the next 5 years.

Bio:
Isaiah Hankel is Tony Robbins for nerds. In 2011, Dr Hankel graduated from the University of Iowa with a Ph.D. in Anatomy and Cell Biology. Since graduating, he has been simultaneously advancing his career in flow cytometry and cellular imaging and his career in personal development and student coaching. Over the past two years, Dr Hankel has launched three online products, worked as an application scientist and cell biology specialist, consulted for 12 different companies, and has given over 250 seminars in 20 different countries throughout Europe, Australia, New Zealand and North America. Dr Hankel has also founded Cheeky Scientist, a networking platform for people earning and holding advanced degrees. Cheeky Scientist’s mission is to provide personal and professional development for intelligent people.
