

**Postdoctoral Research Positions: Immunology and Host-Pathogen Interactions**  
**Department of Microbiology, Boston University School of Medicine**

We invite applications from talented researchers for postdoctoral opportunities. Research in the department focuses on the molecular mechanisms underlying microbial infection and the host immune response (see [www.bumc.bu.edu/microbiology](http://www.bumc.bu.edu/microbiology)).

**Suryaram Gummuluru** (rgummulu@bu.edu) Role of dendritic cells in HIV pathogenesis

**Andrew J. Henderson** (hender@bu.edu) Cellular signals regulating HIV transcription

**Barbara S. Nikolajczyk** (bnikol@bu.edu) Regulation of systemic inflammation in type 2 diabetes and inflammatory bowel disease

**Gregory A. Viglianti** (gviglian@bu.edu) Nuclear and Toll-like receptor cross-regulation of HIV mucosal infection
