NIH Predoctoral Training in Biomedical Big Data Science (T32) Program

Dear Colleagues,

The NIH has announced its BD2K Predoctoral Training in Biomedical Big Data Science (T32) program.

PROGRAM DESCRIPTION:
The NIH solicits applications for graduate training programs in Big Data Science, for the expressed purpose of training the next generation of scientists who will develop computational and quantitative approaches and tools needed by the biomedical research community to work with Big Data in the biomedical sciences. The proposed training programs should prepare qualified individuals for careers in developing new technologies and methods that will allow biomedical researchers to maximize the value of the growing volume and complexity of biomedical data.

FUNDING INFORMATION:
The NIH plans to commit $2 million dollars in FY17. The average size of an award will be approximately $350,000 total cost, and it is expected that about 6 awards will be supported in FY17.

DEADLINES:
Internal Deadline: June 20, 2016
Sponsor Deadline: July 25, 2016

APPLICATION PROCESS:
Boston University may submit one application to this program. If you would like to apply, please send an email indicating your interest to Diana Lehman (dlehman@bu.edu) by June 20, 2016. If we have more candidates than we are allowed to submit, we will conduct an internal review to select our final applicant.

Thank you.

Thomas J. Moore, MD
