MARIA COLE, OTR/L
Spaulding Rehabilitation Network

The Parkinson's Disease and Movement Disorders Center and the Center for Neurorehabilitation clinicians and researchers have developed a comprehensive interdisciplinary course in the management of people with Parkinson's disease. Current evidence based concepts in the field will be shared with participants with the goal of enhancing the care of people with Parkinson's disease in the 21st century.

COURSE HIGHLIGHTS

We are pleased to present the **Fourth Annual Parkinson's Disease Seminar for Healthcare Professionals at Boston University**. For 2011, we have brought back many of our speakers from previous years and invited some additional experts to participate. This unique course continues to provide a cutting-edge, evidenced-based update on the medical and rehabilitative management of patients with Parkinson's disease. Movement disorder experts from Boston University have partnered with the American Parkinson Disease Association (APDA) to bring the latest developments in the field to healthcare professionals invested in providing high quality care to people with Parkinson's disease.

Participants will be provided the tools to become resource clinicians in their practice settings in order to optimize the delivery of care to people with Parkinson's disease and their families.

COURSE INFORMATION

COST:

\$ 295 (registration before April 22nd)
\$ 325 (registration after April 22nd)
\$ 250 if 3 or more people from your facility attend

We are able to offer this valuable course at a reasonable cost due to generous support from the APDA and other educational grants.
