Young Onset Parkinson's Disease Support Groups of Massachusetts

Monthly support groups for young people living with Parkinson's Disease.

We care.
We share.
We hope you will join us.

We are in our 30's, 40's, 50's and early 60's.

We are living active lives.

About Our Young Onset Parkinson's Disease Support Groups

Baby Boomers

Members of this support group are in their 40's, 50's and early 60's.

The group started in 2007. We have almost an equal number of men and women. We usually have 15 to 20 people at each meeting.

We share our experiences of living with PD, working, family life, and recreation. We are physically active, articulate, vibrant and vocal individuals. Our lives are challenged, but not compromised.

We laugh a lot. We cry a little. We are open and candid. We share. We care. We complain. We are grateful. We are hopeful. We respect confidentiality within our group.

We are a comfortable group to join and we have new members at almost every meeting.

Caring Family & Friends

Members of this group are spouses, partners and adult family members of the person with Young Onset Parkinson's Disease.

The group is open to caring friends and family, regardless of whether or not the person with Parkinson's attends one of these support groups.

This is a new group. Having met for the first time in March of 2010.

This group meets monthly at the same time of the Baby Boomers Support Group, but in a separate room. The groups will join together when there is a special presentation.

Younger Young Onset

Members of this support group are in their 20's, 30's and 40's. This group is for both individuals with Parkinson's Disease and their friends and family.

This is a new group formed in 2010.

For more information regarding all three of these groups, please contact the APDA Information & Referral Center.

Phone: (800) 651-8466
Email: information@apdama.org

We invite speakers at the request of our group members roughly 4 times a year. Younger Young Onset members are welcome to attend all groups.
