Facility Development Opportunity
Enhance your Geriatric, Neurologic, & Community Health Expertise

Parkinson's disease (PD) is the second most common neurodegenerative disorder of adults, yet a survey performed in 2008 showed that there is most often minimal content in nursing school curricula on PD.

The Edmond J Safra Visiting Nurse Faculty Program (VNF) is a 40 CEU approved nursing faculty development course which provides didactics, clinical time with patients, participation in a PD support group and the opportunity to develop an independent project. A $2,000 stipend accompanies the 40 CEU’s for nursing faculty who complete the requirements.

There are seven program locations in the United States for 2014. Host site programs have expert faculty who are nationally and internationally recognized as leaders in PD. Nurse faculty in geriatrics, gero-psych, neurology, and community health would benefit from applying to this program.
