About this job

Job description

External Posting Title
Postdoctoral Scientist

Job Description
Seeking talented, highly motivated individuals to join Biogen's formal postdoctoral training program. Individuals will design and conduct laboratory research project in conjunction with mentor in research areas of strategic interest to Biogen. Will design and evaluate experiments and develop new ideas that promote current research. Is expected to actively contribute to the group through innovation and collaboration. Will prepare and publish manuscripts and participate in other scholarly activities as appropriate.

Location
Cambridge, MA, US

Job Category
Research

Requisition Number
24287BR

Qualifications
The ideal candidate will have a record of creativity and scientific excellence as evidenced by
publication record in peer-reviewed journals. He/She must demonstrate a high level of motivation and scientific curiosity along with excellent communication, collaboration and technical skills. Must have strong, documented scientific background in relevant field.

- Culture primary cells and cell lines
- Establishing and performing in vitro analyses of biological samples such as apoptosis, proliferation and migration
- Cloning, protein expression, virus transduction and other molecular biology.
- RNA extraction and real-time PCR performance
- Protein analysis such as ELISA, western blot and protein-protein interaction such as IP, Co-IP and potential protein binding target study (Good experience on proteomics is preferred).
- FACS analysis and Sorting
- Experience with WNT signaling pathway in both development and disease.

Education
PhD and related experience; may include post-doctoral experience. Proven publication record with at least one first author paper.

About this company

Follow company
Biogen (NASDAQ: BIIB) is a biotechnology leader that discovers, develops and delivers innovative therapies to improve the lives of patients with neurodegenerative diseases, hematologic conditions and autoimmune diseases. Patients worldwide benefit every day from our medicines for multiple sclerosis (MS) and hemophilia. Founded in 1978, Biogen is one of the world's oldest independent biotechnology company. Our development pipeline is focused on areas of high unmet medical need, as we pursue new therapies for patients suffering from diseases with few or no treatment options. These include programs for secondary progressive MS, Alzheimer's Disease, spinal muscular atrophy, lupus and amyotrophic lateral sclerosis (ALS), amongst others. With more than 7,500 people worldwide, Biogen is truly a global organization. We are headquartered in Cambridge, Massachusetts, which is home to our research operations. Our international operations are based in Zug, Switzerland and we have world-class manufacturing facilities in North Carolina and Denmark. We offer therapies globally through direct affiliate presence in 30 countries and a network of distribution partners in over 50 additional countries. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability or protected veteran status. Please be advised that all legitimate correspondence from a Biogen employee will come from "@biogen.com" email accounts.
