2015-2016 THIRD YEAR CLINICAL CLERKSHIPS OVERVIEW

MEDICINE 1 CLERKSHIP:

Medicine 1 introduces the clinical tools, knowledge and perspectives of the internist that are appropriate to the "undifferentiated" medical student. The clerkship is designed to develop the student’s capacity to function as a caring, increasingly independent but supervised clinician on a multi-professional team. During the clerkship, students learn clinical medicine while working side-by-side with residents and faculty and help provide care to a cohort of inpatients. Students are expected to be involved in all aspects of patient care including: building a therapeutic relationship with assigned patients; gathering, reporting, and interpreting of clinical information; formulating management plans; contributing to individual and team learning; and working within the systems of care. A key principle that guides student learning is the provision of graduated patient care responsibility (based on the student’s readiness) with supervision.

In addition to the clinical immersion and conferences, this learning experience is complemented by a unique enrichment in which students also work closely in small groups with a Clerkship Director and hone essential clinical skills (including intermediate level communications skills, physical diagnosis, and clinical reasoning).

The Medicine Clerkship 1 is 8 weeks long and is divided into two mini-blocks of 4 weeks each. Students complete their clerkship in the inpatient setting at two sites that provide complementary experiences including: East Newton and Menino Campuses at Boston Medical Center, the West Roxbury VA Hospital, MetroWest Medical Center, and Roger Williams Medical Center. We also expect to have a small group of students complete the clerkship at the Kaiser Health Care system in California.

OBSTETRICS/GYNECOLOGY:

An Obstetrics and Gynecology clerkship is one of the core clinical rotations in the medical school curriculum due to its unique focus on female reproductive health and dysfunction. In addition, Ob/Gyn providers are Women's Health advocates who promote education, safe pregnancy, health maintenance and prevention of sexually transmitted diseases and reproductive cancers. This clerkship emphasizes the doctor-patient relationship, interviewing skills, mastery of the pelvic and breast examination, patient safety and clinical problem solving in patient care. The foundation that you will gain in obtaining skills and knowledge to become a comprehensive health provider of women will be integral to your education in health care and policy, regardless of future specialty choice. For clerkship students interested in women's health, there is ample opportunity to familiarize yourself with the wide variety of career choices available within the field of Obstetrics and Gynecology.

There are six locations of the clerkship available: Boston Medical Center, Metrowest Medical Center in Framingham (MWMC), Beverly Hospital in Beverly, Mt Auburn Hospital in Cambridge and North Shore Hospital in Salem.

**Boston Medical Center:**
The BMC rotation is divided into equal Obstetrics and Gynecology rotations, which include inpatient and ambulatory exposure. Several of the students will travel to the Lahey Clinic (Burlington) for their Gynecology experience. The Gynecology rotation includes exposure to the gynecology subspecialties of Urogynecology, Oncology and Family Planning. There is a late (until 10PM) gynecology call, but no overnights. All BMC based students will have a continuity experience with an Ob/Gyn preceptor, participating in their weekly clinic during the rotation. The Obstetrics rotation will include overnight calls on Labor and Delivery (going home post call). On Obstetrics the student will be exposed to the inpatient and outpatient services, including prenatal diagnosis, Maternal Fetal Medicine and multidisciplinary specialty clinics in substance abuse, HIV and diabetes care in pregnancy. While on Obstetrics, the student will participate in labor management with both the physician and the midwifery care teams.

**Lahey Medical Center, Burlington:**
Six students based at BMC in Obstetrics have the opportunity to participate in the inpatient gynecology service at Lahey Medical Center. The Lahey Gyn service is very busy, and the student is typically in the operating room all day every day. For students interested in surgery, oncology, urogynecology, or Ob/Gyn in general – being at Lahey offers a volume of surgical exposure unavailable at BMC. There is less formalized teaching than at BMC. There is no night call; each student will round one weekend at Lahey. **A car is necessary for this portion of the rotation.**

**Framingham Metrowest Medical Center:**
The Metrowest Ob/Gyn experience highlights the following opportunities: daily teaching sessions, a less intense ob/gyn experience than at BMC, and a heterogeneous patient population which includes a vibrant Portuguese community. As ambulatory experiences are limited, students will return to BMC for continuity clinics half a day per week. The students take call approximately every fifth to sixth night and one weekend per block. **A car is necessary for this rotation.**
**Beverly Hospital:**
The rotation at Beverly Hospital is divided evenly between Obstetrics and Gynecology. The students will receive an overview of all aspects of the field of OB/GYN as well as getting a flavor of the lifestyle of an OB/GYN today. The physicians and midwives at Beverly are in private practice. There are no “clinic” patients. Students will be assigned to work with both physicians and midwives in both the hospital and the office setting. Hours are generally 7-5; one 24-hour weekend call on OB is required. **A car is necessary for this rotation.**

**Mount Auburn Hospital:**
Mt Auburn is a community hospital serving Cambridge and surrounding areas. The clerkship is integrated, with components of clinic, GYN OR and L&D during the week. You take overnight call once or twice a week on Labor and Delivery. One or two days a week are in clinic. You will see a variety of patients in a variety of settings. There is no inpatient GYN rounding. **A car is not necessary to go to Mt Auburn, but many of the clinics are off-site and may require a car.**

**Beth Israel Deaconess Plymouth:** (Previously Jordan Hospital)

**Transportation:** There is a commuter rail station a couple of miles away, it is the Old Colony Line (from South Station). [http://www.mbta.com/schedules_and_maps/rail/lines/?route=OLCOlONY](http://www.mbta.com/schedules_and_maps/rail/lines/?route=OLCOlONY)

If you have a car you can park there, if you have a bike I would encourage you to bring it, you could ride to the station or take a cab.

**Housing:** In a house about a 1/2 block from Plymouth Bay. You are in the upstairs of a house where the 1st floor is offices for pathology scheduling. You share a full kitchen with the staff and you share the house with the 2 students who are there for medicine. The house is located across from the loading dock of the hospital.

You can choose whether to stay there all the time, some of the time or whether to commute (45min from Boston), though you will have 3 overnights covering labor and delivery (from the house if no one is in labor). You are also expected to come to didactics at BMC on Wednesdays.

There is a really nice group of 5 physicians and 6 midwives you will be working with.

**All Locations:**
During the clerkship, each student will prepare and present a clinical case; including patient presentation, pathophysiology, and evidence based management. The Metrowest and Mt Auburn students will do their presentations at their clinical sites. Each student is evaluated based on performance on the National Board of Medical Examiners Shelf exam, and clinical evaluations by preceptors. Successful completion of the clerkship requires a passing grade on the shelf exam, completion of a skills passport, and satisfactory clinical evaluations.

All clerkship students will be on the BMC campus all day on Wednesdays for education day. Students at BMC will have a continuity clinic half a day per week with a faculty member either at BMC or at an outside health center.
FAMILY MEDICINE CLERKSHIP

**Please note - all policies are updated prior to the start of each academic year. Please see clerkship syllabus for exact information for your academic year**

The Family Medicine Clerkship is a six-week core rotation for BUSM third year students.

Family Medicine is the primary care medical specialty concerned with the total health care of the individual and the family. It is a generalist specialty that integrates the biological, clinical and behavioral sciences. In Family Medicine you will take care of all patients – regardless of their age, sex, organ system, or disease. You will learn to care for complex patients, manage chronic diseases and acute presentations, as well as provide evidence based health care maintenance to all types of patients. The doctor-patient relationship is at the core of effective medical care, and you will see and learn its importance during this rotation.

Students will work in high volume ambulatory practices of family physicians and residency programs. You will see patients on your own and be a valuable member of the practice team. You will get the opportunity to have your skills observed.

In the course of the clerkship you will learn:

- To understand and promote a patient-centered model of care;
- To understand Family Medicine approaches to seeing patients and families with undifferentiated problems, and the clinical reasoning which guides the definition and diagnosis of these problems;
- Skill in the evidence-based diagnosis and management of frequently occurring acute and chronic ambulatory problems;
- To understand the patient as part of a family and community;
- To understand and use a comprehensive and continuous approach to care;
- To understand and use techniques of evidence based preventive medicine and health promotion;
- To understand and apply the concepts of Information Mastery to patient care

The Family Medicine clerkship is primarily focused on ambulatory care. While some students will participate in caring for patients in the hospital, nursing home/rehab, and other inpatient/residential settings, the clerks will spend the great majority of their time in the preceptor's office. These settings may be in Family Medicine residency programs, community health centers, or private group or solo practices; students will be able to rank order their site preferences.

**Time at the clinical site:**

- Each half day in the office is called a session. Students will have 47 clinical sessions during the clerkship. If your site has evening or weekend clinic, you will have a corresponding session off during the week. The only reasons for having fewer than 47 clinical sessions are: official clerkship holidays, official BUSM class meetings, and EOTYA sessions.

**Time away from the clinical site:**

Experience at the clinical sites will be complemented by the core curriculum at Boston University School of Medicine and the Family Medicine Clerkship blackboard site.

- During the clerkship the student will spend five days at BUSM: 4 didactic days and one final exam day. Generally the didactic days are 1\textsuperscript{st} and 2\textsuperscript{nd} working days of week one, the 1\textsuperscript{st} day of week three, the 1\textsuperscript{st} day of week four, and the final exam day is the last day of week six. The student will have a half day to do a home visit, as well as 2 half day sessions for reading time and online work. All students will have the final Thursday of the clerkship off. All
other days will be spent at the preceptor’s office. On final exam day, students will have an OSCE and will take the Family Medicine Shelf exam.

- Please expect to be at the medical school for full days (8-5) on all didactic days and final exam day. If possible we finish earlier than 5, but plan to be here until 5 each of those days.

**Strategies for success**

- Immerse yourself in your practice
- Consider yourself part of the clinical team (you are!)
- Read about the diagnoses your patients have IN REAL TIME (use the syllabus’ references)
- Do practice questions **throughout** the clerkship
- Fully participate in the core curriculum
- Be professional

**Required and/or highly recommended texts**

- Essentials of Family Medicine, 6th Edition, by Sloane et al. This text is available new and used at the Bookstore. Please see the information at the bookstore regarding their buyback/return policy
- Additional articles and readings listed in the clerkship syllabus

**Helpful resources**

**Shelf Exam Preparation**

- American Academy of Family Physicians (AAFP) Online board review question bank
- PreTest

**Clinical reference**

- Review articles from the Journal American Family Physician (a thumb drive with articles are provided during the clerkship)
- Extensive training and resources in point-of-care EBM resources is given during clerkship orientation/didactics.

**Evaluation**

Performance will be evaluated by the student's preceptors, a home visit report, an Information Mastery assignment, and an OSCE and shelf examinations at the conclusion of the clerkship. Students will also have to demonstrate competence in certain clinical skills.

**Components of the final grade**

- **Clinical Evaluation**
  - 52%

- **Core Grade:**
  - Information Mastery Assignment: 4%
  - Home Visit Report: 5%
  - OSCE Interview: 5%
  - OCSE Progress Note: 4%
  - Shelf Exam: 30%
Call information

There may be limited night or weekend call required during the Family Medicine clerkship, depending on the site. If you are at a residency or certain private practice sites and are interested in Obstetrics, you may attend Labor and Delivery with the residents and/or attendings after-hours, as well as attend deliveries during the day.

Clinical Sites

The sites utilized by the Family Medicine Clerkship include a number of community health center and underserved sites, such as the Family Medicine Heath Center at Boston Medical Center, Codman Square Community Health Center, South Boston Community Health Center, East Boston Neighborhood Health Center, Manet Community Health Center, Lowell Community Health Center, and Upham’s Corner Community Health Center; private practices in the greater Boston area; and private practices affiliated with Cape Cod Hospital and the Maine Primary Care Association. Clerks are also placed at the following Family Medicine Residency Programs: BUMC Family Medicine Residency (South Boston, Codman Square Health Centers and East Boston Neighborhood Health Center) and Central Maine Medical Center FMRP in Lewiston. Housing is provided at all away sites.

We have additional sites throughout Massachusetts which are available during certain blocks, but do not provide housing. If you have family or housing near one of those locations, you can contact the Family Medicine Department to arrange a placement there. These sites are not offered through E*Value. Please contact us as soon as possible after you receive your 3rd year schedule if you are interested in one of these sites.

All of our sites provide excellent learning experiences for students. We work actively with each site and preceptor to make sure that our students are engaged, seeing appropriate volume and variety of patients, actively coming up with assessments and plans on their own, being observed and receiving valuable feedback.

Once students receive their schedules they will also receive an email with the link to the Family Medicine Site Preference Form. This online form will allow students to give us more detailed information about their interests and preferences. Please fill it out after you have received your 3rd year schedule. Students will then be matched to specific sites by the department based on schedules and interests, as expressed in the online form. We do our best to accommodate all requests, but given the number of spots needed, we are not able to guarantee that all requests will be met.

***Please note that occasionally staffing or other circumstances at a site may change necessitating that a student be switched to a different site, potentially in a very different location than the original placement. This can occur up to the first day of the clerkship. We try if at all possible to avoid this, but sometimes circumstances are unavoidable.***

Our sites are divided into the categories listed below. You will enter your site category preferences through E*Value. Please see the Family Medicine Clerkship Website for the lists and descriptions of the specific sites in each category.

1. Community Health Centers/Underserved
2. Greater Boston Private Practice
3. Central Maine Medical Center - Family Medicine Residency Program
4. Cape Cod Family Medicine Centers
5. Rehoboth/Seekonk Medical Center
6. Valley Medical Group, Greenfield, MA
7. Trailside Health, Shelburne Falls, MA
The list of additional sites NOT offered through E*Value (with no housing provided, see above) is listed on the clerkship website.

Please go to the Family Medicine Clerkship Website to see the list of specific sites in each of the categories above, including the additional sites.

After you have received your Family Medicine Clerkship assignment (one of the 7 above) through E*Value, fill out the Family Medicine Site Preference Form.

Contact Information

**Dr. Miriam Hoffman-Kleiner**

GENERAL SURGERY CLERKSHIP- EIGHT WEEK

Clerkship Director: Jane E. Méndez, MD
Clerkship Coordinator: Ms. Grace Farnham

Students will be assigned to one rotation in each of the following categories:

**Core General Surgery Rotation (4 weeks):**
- Boston Medical Center: (BMC)
- VA Boston Healthcare System: Primarily West Roxbury VAMC
- Cape Cod Hospital (CCH): General Surgery
- Roger Williams Medical Center: Rhode Island
- Metrowest: Framingham
- Kaiser: Santa Clara, CA

- **Two 2 weeks Rotations (2 weeks x 2):**
  - Vascular Surgery: BMC (Smithwick Service)
  - Thoracic Surgery: BMC
  - Minimally Invasive Surgery: BMC
  - Vascular Surgery, VA Boston Healthcare System: (Vascular Surgery rotation for students doing General Surgery at the VA)
  - Anesthesiology: BMC
  - Acute Care Surgery/Trauma: BMC

---

Core General Surgery Rotation:
Responsibilities will be similar at all core hospital locations. You will participate in clinic, the OR, and rounds. Preoperative and postoperative care is emphasized. You will have night/evening and weekend call.

Vascular Surgery Rotation: Duties are similar to those on the core rotation and include OR, clinic, and rounds. You will learn to diagnose and treat vascular problems. You will have weekend call.

Thoracic Surgery Rotation: Duties include OR and rounds. You will learn diagnosis and surgical management of thoracic and pulmonary disease.

Minimally Invasive Surgery (MIS) Rotation: Duties include the OR, clinic and rounds. You will learn about laparoscopic techniques including bariatrics and other minimally invasive surgery procedures. You will have weekend call.

Acute Care Surgery/Trauma Surgery Rotation: Duties include OR, clinic, and rounds. You will assist with trauma and emergency surgery, as well as care in the ER and surgical clinics. You will have overnight and weekend call.

Anesthesiology: Duties include preoperative assessment and assisting with OR care of patients undergoing anesthesia for a variety of surgeries. You will do one weekend shift of Trauma Surgery at HAC.

**Transportation/Lodging:**

- **Kaiser**: this is a new site for the Surgery Clerkship in Santa Clara, California. Students need to have a car and are responsible for their own transportation/housing. There will be an application and selection process as these 16 students will spend their complete third year in California.

- **Metrowest**: this is a new site for the Surgery Clerkship in Framingham. Students need to have a car and are responsible for their own transportation/housing.

  Regarding call: because BU students return to BU post pm rounds on Thursday for Friday didactics. You need to be back on the Cape for any weekend call or Sunday night for Monday morning rounds.

- **Roger Williams Medical Center**: this is a new site for the Surgery Clerkship and housing in close proximity to the hospital will be provided. You will need to bring bedding, towels and hangers.

  Regarding call: BU students return to BMC post pm rounds on Thursday for Friday didactics. You need to be back to Roger Williams for any weekend call or Sunday night for Monday morning rounds.
- **Cape Cod Hospital Rotation** - Housing is provided in a house owned by Cape Cod Hospital about a 2 minute walk from the hospital. The house has 4 bedrooms and is shared by other health professional students (i.e., Northeastern nursing and pharmacy students). It has 2 bathrooms and a full kitchen with the basics. You will need to bring bedding, towels and hangers. Meals are not provided, but the 'employee' discount is significant at the cafeteria.

  Contact Ms. Donna Moran about where to report for your first day, as she is responsible for checking all your paperwork, getting you oriented and getting you a house key, pager and badge. You will need to provide a refundable $30 cash key/badge deposit.

- **Other Transportation Issues** - Both locations of the VA are slightly outside the city and are best reached by car. Public bus service does not run in the early morning. Carpooling is encouraged. Approximate driving times from Boston Medical Center are listed below:

  Metrowest: 1.0 hour  
  Roger Williams Medical Center: 1.5 hours  
  Cape Cod Hospital: 1.5 hours  
  VA Jamaica Plain: 25 minutes  
  VA Roxbury: 40 minutes

**Breast Clinic:**
All students will attend one breast clinic session during the core general surgery portion of their rotation. Students rotating at BMC will be assigned to attend breast clinic in the Belkin Breast Clinic at Moakley. Students who have core rotations at the VA, Metrowest, Roger Williams Medical Center, Cape Cod Hospital and Kaiser will attend breast clinic at those sites.

**Friday Lectures:**
All students will attend mandatory didactic sessions Fridays at BMC throughout the clerkship. The sessions usually run from 10:00am until 6:30pm.

**Rotation Scheduling**
- You will be assigned to the VA or BMC as a core hospital by the E*Value system.
- Before your scheduled block, you will receive the ranking form via email.
- Please pay attention to the deadline and submit your rotation preferences as instructed in the ranking form.
- The Surgery Education Office will try to accommodate your preferences within the restrictions of the various services and locations.
- The students’ preferences/selections will be reviewed and the block schedule will be assigned.
- Once finalized, the block schedule will be sent to the students via email. Please verify and review your schedule.
- Students who do not complete and return the information by the stipulated deadline will be assigned to unfilled rotations and forfeit the privilege to request their preferences.
- Requests for schedule changes cannot be accommodated.

If you have any questions please contact Ms. Grace Farnham at the Surgical Education Office at 617-638-8443.
PEDIATRICS CLERKSHIP

Clerkship Director: Rachel Thompson, MD
Director, Medical Student Education in Pediatrics

Associate Director: Colin Sox, MD, MS

Clerkship Coordinator: Ms. Therese D’Agostino

For the 2015-2016 academic year, there are five sites where students can elect to fulfill the core clerkship in pediatrics. All of the clerkship sites share common clerkship goals and learning objectives. All students attend the weekly core conferences at Boston Medical Center held on Tuesday afternoons.

Boston Medical Center

The clinical experiences at BMC are divided into an inpatient ward experience, time in the newborn nursery, and an outpatient experience. The time spent on outpatient may include shifts in the pediatric emergency department, primary care and subspecialty clinics, pediatric x-ray and pediatric neurology. Students in the CCHERS Community Partnership Program do the ambulatory component of the clerkship at their CCHERS site and the inpatient and nursery components at Boston Medical Center. In addition, students may be scheduled to rotate through the neonatal intensive care unit (NICU) and/or Pediatric ICU. During the inpatient experience, students will work on the general pediatric ward at BMC as part of the team of house officers (interns and residents) and faculty. The typical schedule includes a combination of day and night-shifts with weekend call. The Birthplace (nursery) experience is neonatal general pediatrics, with a brief introduction to the newborn intensive care unit. During the outpatient portion of the clerkship, students will have the opportunity to care for patients presenting for urgent care issues, well-child visits, and have an introduction to care of the subspecialty patient. There are daily conferences held at noon which students will attend throughout the BMC rotation, as well as Grand Rounds and Case of the Week conferences on Thursday and Friday mornings.

- The site director at Boston Medical Center is Arvin Garg, MD and the assistant site director is Catherine (Kate) Distler, MD.

Boston Medical Center/Boston Children’s Hospital (BMC/BCH)

The clinical experiences at BMC/BCH will include rotating at BCH on the inpatient pulmonary ward for three weeks and rotating at BMC for 3 weeks through an outpatient experience and the newborn nursery. In addition, students may be scheduled to rotate through the NICU and/or PICU. At BCH, students will work closely with the house officers and faculty team; the students’ clinical experience may include periodically taking late “call” (e.g. caring for patients until 10pm). The outpatient experience may include shifts in the pediatric emergency department, primary care and sub-specialty clinics at BMC or at an outside clinic (such as a neighborhood health center). Students in the CCHERS Community Partnership Program do the ambulatory component of the clerkship at their CCHERS site and the inpatient and nursery components at Boston Medical Center. The nursery experience is rotating on the general newborn nursery at BMC, which may include a brief introduction to the newborn intensive care unit. This clerkship site provides a core experience in pediatrics. There are daily conferences held at noon which students will attend throughout the BMC portion of the rotation, as well as Grand Rounds and Case of the Week conferences on Thursday and Friday mornings.

- The site director at Boston Medical Center is Colin Sox, MD; the site directors at Boston Children’s Hospital is Debra Boyer, MD.

Beverly Hospital

Beverly Hospital is a 227-bed facility that serves the healthcare needs of residents of Beverly and its surrounding communities. Through collaboration with Boston Children’s Hospital (BCH), Children's physicians located on site at Beverly Hospital coordinate both inpatient care and outpatient emergency services for pediatric patients. BCH physicians work in conjunction with Beverly Hospital's primary care physicians to care for children who need emergency services or inpatient hospitalization. Should a patient require hospitalization, we have a bright and sunny 11 bed inpatient pediatric unit. The Pediatric team also cares for Newborn Nursery infants whose future care will be provided by those physicians who do not round in the nursery at Beverly Hospital. Special features of the newborn service include Beautiful Beginnings, the North Shore Birth Center, a breastfeeding program, and a Doula Program. BCH neonatologists provide medical care for sick and premature newborns in the Beverly Hospital's Level II Special Care Nursery. Within the hospital’s Emergency Department, there is a Pediatric Emergency Service to provide care for children less than 19 years of age. The BCH physicians perform routine urgent care and trauma care,
including laceration repair and sedation for fracture reduction. They also stabilize acutely ill patients prior to transfer to a tertiary facility if necessary.

The outpatient experience will include six half-day sessions at Beverly-affiliated pediatrician’s offices. The hospital-based portion of the rotation will integrate nursery, inpatient, and Emergency Room experiences. There is opportunity for pediatric subspecialty exposure as well.

- Students need a car for this rotation. While the hospital is accessible by commuter rail, it will also require a short cab ride (1.5mi) to reach the hospital. The drive is approximately 30-40 minutes from BUSM.
- Beverly Hospital accommodates 2 students on selected blocks.
- The pediatric clerkship at Beverly Hospital is directed by Meghan Weir, MD.

**MassGeneral for Children at North Shore Medical Center**

MassGeneral for Children at NSMC, is a 20-bed pediatric facility in Salem, Mass. It draws from all communities north of Boston, up to the New Hampshire border. MassGeneral for Children is an affiliate in the Partners Health Care system, and so draws its residency complement, as well as pediatric sub specialists from the department of pediatrics at Massachusetts General Hospital. Immediate supervision of students is by a staff of interns, residents, and a teaching senior resident from the MGH program. The junior clerkship at MassGeneral for Children at NSMC has been in existence for over thirty years, with students from BUSM beginning in 1998-99. Students work under the ultimate supervision of an active in-house attending staff that plan all curriculum activities, coordinate the rotation, and provide evaluation. Students rotate through an inpatient floor, the fifth busiest pediatric emergency room in the state, and a nursery (level I & II). The clerkship experience is rounded out with core lectures and grand rounds, as well as visits to outside pediatricians’ offices. Students report to Ms. Maryann Rowen, who coordinates the program, out of the office of Dr. Edward Bailey, Chair of Pediatrics.

- The site director at MassGeneral for Children at NSMC Dr. Edward Bailey and the associate site director is Elizabeth Coray, MD.
- The hospital is easily reached by public transportation as well as by car; the drive is approximately 30-40 minutes from BUSM.

**Winchester Hospital**

Located just north of Boston, Winchester Hospital serves the health care needs of many surrounding communities and is the first community hospital to receive the Magnet Award for outstanding nursing care in all of Massachusetts. In addition to its adult medical services and facilities, Winchester Hospital has a 12-bed Pediatric unit, a 4-bed Pediatric Emergency Department and an extensive Obstetrics and Neonatology division that supports close to 3,000 births annually and can provide Level II specialty care to 16 newborns in their Special Care Nursery. Through Winchester’s unique partnership with Boston Children’s Hospital (BCH), pediatricians and neonatologists come to Winchester Hospital and staff the pediatric programs and special care nursery 24 hours a day, seven days a week. The pediatric emergency room serves patients for 12 hours a day, seven days a week and is staffed by pediatric emergency medicine-trained pediatricians from BCH as well. The students also do a two-week outpatient experience in addition to the inpatient and special care nursery experiences. During the Pediatric clerkship, two students rotate at Winchester Hospital in selected rotations.

- The site director at Winchester Hospital is Nadine Aprahamian, MD, and the associate site director is Robyn Byer, MD.
- During the Pediatric clerkship, two students rotate at Winchester Hospital in selected rotations.
- Students need a car for this rotation, the drive is approximately 20 minutes from BUSM. Commuter rail service is available, but students will need to take a short cab ride (1.5mi) from the train to the hospital.

**Site assignment**

Students will be assigned to their core pediatrics site through the E*Value System. Requests for schedule changes cannot be accommodated.

If you have any questions, please contact: Therese D’Agostino in the Department of Pediatrics:

Phone: 617-414-5576
Email: therese.d’agostino@bmc.org
**Psychiatry**

**BayRidge Hospital**
60 Granite Street, Lynn 01904, 781-599-9200  
Coordinator: Barry Ginsberg, M.D., bginsber@nhs-healthlink.org  
Administrator: Debbie Krinsky, 781-477-6965, DKRINSKY@nhs-healthlink.org  
This is the free-standing hospital component of the larger general hospital, Beverly Hospital. Students will be assigned to one of three units: a general psychiatric unit (31 beds), a dual diagnosis unit (substance abuse together with another mental disorder), (24 beds), and/or an intensive observation unit (6 beds). Opportunities will exist for the students to follow patients from the moment of their presentation and evaluation at the Psychiatric Emergency Room through their hospital stay and subsequent partial care or outpatient treatment. Staff psychiatrists will supervise student work and present the didactic curriculum. This placement presents a good opportunity to participate in the treatment of patients from a wide range of backgrounds presenting a wide range of acute and chronic mental disorders.

**Bedford VA (Edith Norse Rogers Memorial Veterans Administration Hospital)**
200 Springs Road, Bedford, 781-687-2363  
Coordinator: Frances Frankenburg, M.D.  
Administrator: Doreen Asselin, 781-687-2478, doreen.asselin@med.va.gov  
This is a hospital with 2 inpatient psychiatry units and a very large outpatient program. Students are assigned to substance abuse, outpatient services, and consults to Nursing Home Patients. The student is under the general supervision of the staff psychiatrist in charge of the unit of assignment but also receives supervision and much teaching from other staff psychiatrists. There is a well-structured series of didactic seminars. Additional opportunities exist on the consultation and liaison service and acute admissions. It is a large campus with many psychiatric patients. Reach out to Dr. Frankenburg to see more patients. She is very friendly, and allows students to call her if they have free time.

**Boston Medical Center - East Newton Campus**
BMC, East Newton Campus, Robinson B-410  
Coordinators: Isidore Berenbaum, M.D., bbq@bu.edu  
Jeanne Horner, M.D., Bjeanne.Horner@bmc.org 617-638-8548,  
Students’ assignment is to the Psychosomatic Service at Boston Medical Center on the East Newton Campus. Students work closely with the staff psychiatrists responsible for evaluating and following patients on the medical, surgical, and neurological services of the hospital. The students will be supervised by attending psychiatrists and psychiatric residents. There is a weekly case conference and teaching conference as well as daily morning rounds.

**Boston Medical Center - Emergency Room**
BMC, Menino Pavilion Emergency Department  
Coordinator: Catalina Melo, M.D., Catalina.melo@bmc.org  
Medical students’ will be assigned to the ER service at the Menino Pavilion. Students will shadow the psychiatrists and clinicians and see a great variety of patients in the ER.

**Bournewood Hospital**
300 South St., Brookline, Stedman Admin. Building  
Coordinator: Carmel Heinsohn, M.D. carmel.heinsohn@bournewood.com  
Administrator: Marilyn Budd, 617-469-0300 x308, marilyn.budd@bournewood.com  
The Bournewood Hospital is a 90-bed psychiatric facility located in South Brookline. Inpatient units consist of 3 acute treatment wards, a dual diagnosis unit, and an adolescent unit. In addition, there is a partial hospitalization unit and an outpatient clinic. Students will be responsible for participating in the admission and work-up of patients as well as following their hospital course, writing progress notes, and presenting at rounds. There will also be exposure to ECT, and a didactic seminar. There will be individual clinical supervisors as well as a certain amount of coverage in the admission and triage area.

**Brockton VA Hospital**
940 Belmont St, Building 2, 3rd Floor, RM A-304, Brockton, 508-583-4500  
Coordinator: Alexandra Pinkerson, M.D., alexandra.pinkerson@va.gov  
The Brockton Hospital is a 465 bed Veteran hospital with several inpatient psychiatric units. Inpatient units consist of 2 acute and 2 chronic treatment wards, a chemical dependency unit, and an emergency department. In addition, there are partial hospitalization, as well as day hospital facilities and an outpatient clinic. Students will be assigned to a locked acute psychiatric unit. On the acute ward they will attend daily rounds and see work-ups of new admissions. They will be responsible for an initial comprehensive lifetime psychiatric history of each of their assigned patients (usually one or two) and daily progress notes. There will also be elective or assigned opportunities to observe ECT treatment and group therapy sessions. There will be individual clinical supervision by the attending psychiatrists and a chance to become part of the entire treatment team consisting of nurses, a nurse practitioner, social worker, psychologist, recreation therapist, pharmacist and occupational therapist.
Mount Auburn Hospital  
330 Mount Auburn St., Cambridge, MA, 02138, Clark Bldg., 1st Floor  
Coordinator: Joseph D’Afflitti, M.D., 617-499-5008, jdafflit@mah.harvard.edu  
Mount Auburn Hospital is a 190-bed community teaching hospital. This clerkship site provides medical students with an experience in general hospital psychiatry. Students will evaluate and follow patients on our inpatient geriatric psychiatry unit, and will also participate in psychiatric consultations to patients on our medical and surgical inpatient units, and to patients in our emergency department. In all areas, students will work closely with supervising attending psychiatrists.

Our Lady of Fatima  
200 High Service Ave., North Providence, RI 02904  
Coordinator: Dr. David Kroessler.  
Administrator: Susan Saccocia, (401) 456-2388, ssaccoccia@rwmc.org  
This will include rotating through 2 Providence general hospitals that are located 2 miles apart, Roger Williams Medical Center and Lady of Fatima Hospital. Students will reside on the campus of RWMC in a free-standing house across the parking lot from RWMC; most of the rooms are single with shared baths and kitchens. The academic experience for med students will include exposure to inpatient psychiatry, geriatric psychiatry, dual-diagnosis psychiatry/addiction psychiatry, outpatient psychiatry, and consultation-liaison psychiatry. There will be additional experiences with electroconvulsive therapy, emergency department psychiatry, and administrative psychiatry. Students will be expected to attend tutorials in NBME topic areas, psychopharmacology, child psychiatry, and eating disorders. The expectation is also that students will need to attend all Boston-located meetings/seminars.

West Roxbury VA  
1400 VFW Parkway, West Roxbury, 02132,  
Coordinator: Kathik Sivashanker, M.D. karthik.sivashanker@va.gov  
Medical students will spend 6 weeks at the West Roxbury VA Hospital on the Consultation-Liaison Psychiatry service. They will work closely with the attending psychiatry staff as well as fellows in psychosomatic medicine and psychiatry residents. Students will be responsible for the psychiatric care of 2-4 patients per day and will follow their medical and psychiatric hospital course. There is extensive exposure to general psychiatry, forensic psychiatry, emergency room psychiatry, as well as consultation-liaison psychiatry. There are weekly seminars, case presentations, daily rounds, individual supervision, and academic presentations throughout the 6 weeks.

Westwood Lodge Hospital  
45 Clapboardtree Rd., Westwood, 02090 Administration Building  
Coordinator: Paul Arkema, M.D., 781-762-7764 x168  
This is a 100-bed private psychiatric hospital characterized by locked inpatient units, open inpatient units, a child psychiatry unit and several specialized treatment services. Students are supervised by a staff psychiatrist and also have the opportunity of working closely with the attending psychiatrist. They are given a good deal of responsibility for treating patients assigned to them both in terms of evaluation and ongoing psychotherapy. Additional opportunities exist in child psychiatry, drug abuse, day hospital programs as well as possible participation in clinical research projects.

St Elizabeth’s Medical Center  
736 Cambridge Street, Dept of Psychiatry QN3P, Boston, Ma 02135.  
Coordinator: Joseph Cocozzella, M.D., 617-789-2117  
Administrator: Tara Lauriat, 617-789-2404 tara.lauriat@steward.org  
The rotation will be divided between the Adult Inpatient Unit, Geriatric Psychiatry Unit, and the Consult/Liaison team. Students have the opportunity to observe ECT one or more times during the rotation in the morning. Students can also observe outpatient intakes or groups in the Partial Hospital Program (day program). The program coordinator can arrange these experiences.
The goal of the Clerkship in Neurology is to teach the students how a Neurologist thinks about disease. The objectives include:

1. The ability to perform a detailed neurological history and examination and to record the results.
2. The ability to interpret historical information and abnormalities found on examination so that the lesion may be localized in the nervous system (where’s the lesion?).
3. Familiarity with common neurological diseases so that knowledge of location of the lesion can lead to the generation of a differential diagnosis (what’s the lesion?).
4. Familiarity with the presentation and pathophysiology of common neurological disorders and disorders associated with common medical and surgical conditions;
5. An understanding of the rationale for the treatment and prevention of neurological disease;
6. Familiarity with the prognosis, psychosocial and economic aspects of long term neurologic impairment and disability.

Each student will be assigned to one of several clinical sites where a coordinator will oversee the clerkship. The course objectives, core reading material and student evaluation policy will be provided to the students in the online material.

The purpose of the Radiology Clerkship is to expose students to all common imaging modalities, their uses and limitations, and to develop a systematic approach to image interpretation. Students also have an opportunity to see radiology in action, watch patients undergo exams, see consultation between clinicians and radiologists, and gain an appreciation of the contribution of imaging to clinical care.
