

You observe one of your interns go in to interview and examine a patient. The patient complains of symptoms of heroin withdrawal. The intern seems to ignore the patient's concerns, and using lots of medical jargon, tells the patient that she will die unless she "kicks the habit" . ALL parties are extremely frustrated after a few minutes – yourself included.

You follow him out of the room and:

- a) Smack him on the head- that should knock some sense into him
- b) Tell him that he should rethink his career decision, as he clearly lacks people skills
- c) Shrug and ignore the episode-he is really bright and technically excellent
- d) Choose the appropriate time and offer some thoughtful and well directed feedback

4) Include learner self-assessment

Fostering self-assessment:

“Do **YOU** feel that **YOU** are able to identify alcohol withdrawal symptoms in a hospitalized patient?”

“Are **YOU** comfortable with **YOUR** skill at eliciting a substance use history?”
