

Evans Day: November 5th from 12:30-1:30pm

Shining Light on BU Affinity Research Collaboratives (ARCs):

“BU Covid-19 pre-clinical ARC research”

Introductory notes: Dr. Katya Ravid, Professor of Medicine and Biochemistry, Founding Director, Evans Center for IBR, BU-Interdisciplinary Biomedical Research Office (IBRO), and Team Science Leader, CTSI

Innovative approaches to Covid-19 pre-clinical research and relevance to equitable care:

Dr. Markus Bosmann, Associate Professor of Medicine, Pathology & Laboratory Medicine; ARC Director; Investigator, National Emerging Infectious Diseases Laboratories (NEIDL)

“Our first 300 days in COVID-19 research”

Dr. Mohsan Saeed, Assistant Professor of Biochemistry, ARC co-Director; Investigator, NEIDL

“Evasion of antiviral innate immunity by SARS-CoV-2”

Dr. Darrell Kotton, Professor of Medicine, Director and Founder, CReM

“Understanding the inception of COVID-19 pneumonia using in vitro stem cell models”

Drs. Karen Jacobson and Benjamin Linas, Associate Professors of Medicine, ID section

“Building a Clinical Research Response to COVID-19”

Respiratory Viruses as an epidemic now, and beyond:

Dr. Jay Mizgerd, Professor of Medicine, Director, Pulmonary Center

Open Discussion/Q&A following the presentations
