

Targeted Users: GIM & Family Medicine
Release date: 3/20/2020

BMC Requesting an E-Consult from Renal (for GIM & FM)

Due to the high volume of internal referrals to the Renal Clinic from GIM & Family Medicine, a new workflow has been developed that will allow Primary Care Physicians to send a request for an E-Consult to the Renal Clinic. With this, a patient can receive medical advice remotely, unless a visit is necessary.

Sending a Request for E-Consult

- From within an Office Visit or Telemedicine encounter, open the E-Consult activity from the More menu > Quick Navigators > E-Consult.

Note: You have the option to click the star icon to favorite this activity. Doing so will dock it on the left hand side of your workspace.

- Open the **Select Consulting Department** section and select "Renal Medicine". A "Reason for E-Consult" row will appear. You'll notice how it mentions that Renal would like a list of lab results from a certain SmartSet. You may preview and order these labs in the next section.

- In the SmartSets section, search for the corresponding SmartSet and open it. You can select, de-select, and add any orders here. Sign the SmartSet once you're done.

- Ambulatory Referral To Urology: General

- In the Send Chart section, indicate the **BMC AMB Renal Econsult** pool as the recipient (you may search for **p renal econ** to find the pool). You may choose to send your E-Consult message when you close the section or exit the patient's workspace. You may write a routing comment to the Specialist here, if you wish.

Hi Renal clinic,
 May you please have a look at this patient?
 Thanks,
 - Primary Care Physican

- You may bill for the time spent initiating your request for an E-Consult (must be 16+ minutes). To do so, head to the Charge Capture section and find the "E-Consult" section. It contains one code, 99452, for this. If you will bill, add text to your Progress Note indicating how much time was spent (you may use the SmartPhrase .ECONSULTREFPROVBILL for this).

Message

Jasvinder Bhatia, MD to Rebecca Grochow Mishuris, MD; 3/29/2020 5:31 PM

Thank you for sending this over.
Please have a look at my findings and advice.
- Nephrologist

Attached Progress Notes

E-Consult Written Report/Note:

I was asked by Rebecca Grochow Mishuris, MD to consult on this patient, Medicare Test, due to Reason for E-Consult: Persistent Hematuria

Based on my review of the information provided, I would recommend: this is a test.

My selected, determined Diagnosis/es:

- Chronic kidney disease (CKD), stage I**

Please note this is an advice only encounter based on communication with another provider and brief review of the above question and information provided. There was no direct clinical evaluation. I did not personally obtain a history or complete a physical evaluation. I spent 15 minutes on this E-Consult.
