

Immediate Dermatology Appointment Online

For your convenience during the COVID crisis, Boston University Dermatology at BMC now offers care through safe and secure online dermatologist consultations. This "virtual care" is just like an in-office appointment with the dermatologists you trust, but is available when you need it most with appointments often same day or within 2-3 business days. We offer either Telephone or Tele-video appointments and if you need an interpreter we will arrange it.

With the continuing COVID related request to stay home, it's a good opportunity to call and schedule an appointment for:

- ✓ Children with our Pediatric Dermatologists
- ✓ Skin, hair and nail conditions such as acne, rosacea, psoriasis, & rashes
- ✓ Skin and mole checks for cancer screening
- ✓ Follow-up and prescription refill requests
- ✓ Cosmetic dermatology consultations
- ✓ Mohs micrographic surgery consultations

Whether you have a busy schedule or an urgent (but non-emergency) need, online communications make access to our board-certified dermatologists easier, faster and more convenient than ever for patients. In light of the current COVID pandemic, MOST insurance plans will not require referrals or copays and will cover the cost of the visit.
