

We hope that you and your family are safe during these uncertain times but are excited that you have made the decision to come to Boston, BU and Graduate Medical Sciences (GMS). It is just the beginning of your time with GMS, but we have you covered throughout your entire experience at Boston University.

Did you know that BU's Graduate Medical Sciences has a team dedicated to preparing students for success after graduation? [GMS's Professional Life](#) office (previously known as Broadening Experiences in Scientific Training) hosts events throughout the year that connect Masters, PhD, and Postdocs with alumni in their field, teach students how to prepare resumes and social media profiles, provide behind-the-scenes looks at various industries, and so much more!

We are preparing you at every level in your academic career to be able to enter the workforce following graduation. GMS wants you to be successful and *Make a Difference*. Our primary goal is to provide programming to help students feel more confident while building skills to be a leader. You have made the best choice starting your graduate education in Boston as we have connections with the booming biotech sector of industry, innovative research and healthcare opportunities.

Check out the list below for just a few examples of events we've hosted to help students be successful in their job searches and careers.

- Multiple career panels for industry, academia, policy, nonprofits, etc.
- Tips for creating your biomedical resume with Scismic
- One-on-one career coaching with Lauren Celano
- Entrepreneurship in science seminar series
- Biotech seminar series (with Biogen)
- Speakers from pharmaceutical, consulting, and medical writing companies
- FDA and Policy Workshop
- NIH grant writing workshops
- Anti-procrastination: Create an IDP for your life
- Dealing with difficult conversations
- Networking events

If you are interested in learning more about our professional development initiatives and events, please do not hesitate to reach out to us. We cannot wait to see you this Fall!

Best regards,

Mina Moussavi, PhD
Program Leader of Professional & Career Development
Assistant Professor of Physiology and Biophysics
