

Join us for a pilot two-part mentee series for first-generation graduate students in STEM!
Presented by the Newbury Center

(All Students Welcome)

How to Find a Mentor (STEM Edition) Part I

Mentoring is key to a graduate student's success and progress in academics and career preparation/development. In this workshop, participants will identify key aspects of a mentoring relationship that they value, develop skills and attributes to succeed with different types of mentoring styles, and provide perspectives from a panel of current graduate students. Mentoring conventions in STEM disciplines will be highlighted through discussions and case studies. ***Refreshments will be provided so please register to attend.***

Friday, September 24th from 3-4:30 PM

Room K103, East Concord St

Communicating Effectively With Your Mentor (STEM Edition) Part II

Communicating effectively is key to a successful mentor-mentee relationship. This workshop will provide participants opportunities to generate approaches that address communication challenges with academic mentors and strategies for assertive, clear communication. ***Refreshments will be provided so please register to attend.***
