STUDENT INFORMATION

PhD Summer Research Status Form

A student in a degree program who is engaged during the summer in full-time research as an essential component of the graduate degree program is eligible to register for Summer Research Status and to be certified as a full-time student. This will establish the individual's official student status for purposes of loan eligibility and tax considerations. There is no charge to register for Summer Research status. Summer Research Status is available only for students continuing their studies in the fall; this status does not satisfy the mandatory registration for the final two semesters during which degree requirements are completed.
