### EMPLOYEES IN SPECIAL CATEGORIES

**Q. If the employee is pregnant**

A. Employee should continue to work, however, they should not be assigned to care for patients who are being ruled out or who have been confirmed with COVID-19, if possible. We are recommending that women who at 37wks gestation and greater not perform any confirmed COVID-19 patient-facing activities. Please email [COVID19WWC@bmc.org](mailto:COVID19WWC@bmc.org) if you would like to consult with one of our OB providers.

**Q. If the employee is immunocompromised (e.g., on immune-suppressants, active hematologic malignancy)**

A. Employee should continue to work, however, they should not be assigned to care for patients who are being ruled out or who have been confirmed with COVID-19. In this circumstance, please email [COVID19WWC@bmc.org](mailto:COVID19WWC@bmc.org) for consultation on your specific situation.

**Q. If the employee is > 60 and has significant medical comorbidities (e.g., cardiovascular disease, pulmonary disease)**

A. Employee should continue to work, however, they should not be assigned to care for patients who are being ruled out or who have been confirmed with COVID-19, if possible. In this circumstance, please email [COVID19WWC@bmc.org](mailto:COVID19WWC@bmc.org) for consultation on your specific situation.

**Q. If the employee reports cohabitation with a person who is immunocompromised (e.g., on immune-suppressants, active hematologic malignancy)**

A. Employee should continue to work, and if possible, avoid direct care of COVID-19 patients. They should develop isolation plans from that co-habitant if they have a known exposure to a COVID-19 confirmed case or develop symptoms.
