## **OPEN POSITION**

### **The Department of Obstetrics & Gynecology at Boston University Medical Center is recruiting for a full-time Academic Maternal Fetal Medicine Specialist**

We are an academic medical center and a safety net hospital with a cross-disciplinary core dedicated to dismantling internal and external health inequities. If you envision a career ensuring Maternal Fetal Medicine excellence for structurally marginalized populations that centers on social justice, then we invite you to get in touch with us. Our MFM specialists are embedded in hospital-wide equity initiatives through BMC's Health Equity Accelerator. The Accelerator's Equity in Pregnancy initiative links hospital research, operations, and analytics to address the root causes of racial health inequities, including digital interventions and cultural transformation.

Emphasizing community-based care, Boston Medical Center (BMC) is the largest safety-net hospital in New England and is committed to providing consistently excellent and accessible health services to all, regardless of insurance status or any other considerations. The hospital is also the primary teaching affiliate of the nationally ranked Boston University Chobanian & Avedisian School of Medicine, which is a world class research institution with more than \$250 million in research grants each year. MFM faculty are engaged in funded research in genetics, digital health, hypertension, health-related social needs, and substance use disorders, among other areas.

BMC has a mission that focuses on public health, both domestic and global, and a commitment to health for pregnancy-capable people demonstrated by recently renovated state of the art facilities. We are a full service tertiary care service consisting of 41 physicians, 24 Certified Nurse Midwives, 7 Nurse Practitioners, 2 Physician Assistants, and 5 Genetic Counselors. There are over 2,900 deliveries per year at BMC. Our OB-GYN ambulatory care clinic is a busy academic practice, with approximately 55,000 visits per year. 30% of our current faculty and 65% of our current residents identify as Underrepresented in Medicine (URiM).

This position has primarily clinical responsibilities, including coverage of the antepartum service, obstetrical ultrasound, prenatal diagnosis, perinatal consultation, and management of the Labor floor. All faculty members are expected to participate in scholarly activities, resident and medical student education, and research. We have an OB/GYN residency program with five residents per year as well the first Maternal Health Addiction Fellowship in the United States, led by one of our MFM faculty.

#### **Minimum qualifications:**

- Applicants must possess an MD/DO degree from an accredited medical school and have or be eligible to obtain a Massachusetts Medical License
- Must be board certified or board eligible in Obstetrics and Gynecology and must have completed a Fellowship in Maternal-Fetal Medicine

- Fluency in Spanish, French, and other languages other than English, is highly desirable, but not required

Applicants must have the ability to work collegially within a diverse environment and demonstrate a commitment to our institutional values regarding diversity, equity, and inclusion. Consistent with our commitment to meet our patients' desire for concordant care, BIPOC (Black/Brown, Indigenous, and other People of Color) applicants are encouraged to apply. Academic appointment will be at Boston University School of Medicine; rank is commensurate with experience and CV. We offer a competitive salary and an attractive benefit package.
