**The Department of Obstetrics and Gynecology at Boston Medical Center  
is recruiting for a Per Diem Midwife**

Are you committed to providing midwifery care to marginalized communities in Boston? Are you interested in joining a diverse group of talented, driven midwives committed to providing exceptional care in a tertiary care center, and teaching future generations of birth workers and providers? The Midwives at Boston Medical Center are looking to hire a per-diem midwife to join our practice and provide inpatient care on labor and delivery, triage, and postpartum.

Boston Medical Center (BMC) is more than a hospital. It is a network of support and care that touches the lives of hundreds of thousands of people each year. The institution has a strong focus on public health, both domestic and global, and a commitment to women's health demonstrated by a robust family planning program, recently renovated labor and delivery unit, and plans for a birth center.

Our department and health system are committed to and focusing on eliminating racial disparities in health outcomes. Emphasizing community-based care, BMC is the largest safety-net hospital in New England and is committed to providing consistently excellent and accessible health services to all. The hospital is also the primary teaching affiliate of the nationally ranked Boston University Chobanian & Avedisian School of Medicine.

The midwifery service is a multicultural group of 30 midwives who together speak English, Spanish, Haitian Creole, Cape Verdean Creole, Portuguese, French, Arabic, German, and Thai. We are committed to holistic and innovative care for birthing people and their families. We have a robust Centering Pregnancy Program, as well as a multi-cultural doula service offering home visiting and labor support (Birth Sisters).

The hospital midwifery service attends approximately 900 births per year in the labor and delivery unit. Midwives also run our busy triage unit during the day, touching the lives of almost all our pregnant and birthing people. Midwives also provide care to women in four neighborhood health centers, the hospital OB-GYN clinic, and our Adolescent Center to a population that is racially, ethnically, and economically diverse. The CNM hospital service includes labor and delivery coverage 24 hours/day, a daily post-partum rounding service, and daily coverage of our obstetrical triage unit. We work in a collaborative model with highly supportive obstetricians, maternal-fetal medicine doctors, and family medicine physicians.

This is a clinical teaching position. Midwives at Boston Medical Center participate in the education of resident physicians, medical students, and midwifery students through clinical supervision throughout clinical care, through didactic lectures, and in the simulation lab. Interest in teaching and working with diverse teams of people is essential.

We welcome another energetic midwife with a passion for birth, a commitment to serving diverse populations, an interest in teaching, and a team-oriented style.

**Minimum Qualifications**

- At least five years of midwifery experience relevant maternal/child health experience
- A demonstrated commitment to racial and social justice

- Active Massachusetts Midwifery license

**Preferred Qualifications**

- Second language (Spanish, Haitian Creole, Cape Verdian Creole or Vietnamese) strongly preferred
- Experience working with underserved populations

Applicants must have the ability to work collegially within a diverse environment and demonstrate a commitment to our institutional values regarding diversity, equity, and inclusion. BIPOC (Black/Brown, Indigenous, and other People of Color) applicants are encouraged to apply.
