**The Department of Obstetrics and Gynecology at Boston Medical Center
Boston University Chobanian & Avedisian School of Medicine
is recruiting for a reproductive health and gynecology Nurse Practitioner
to care for patients in our ambulatory care clinic**

We seek candidates whose experience, teaching, research, or community service has prepared them to contribute to our commitment to diversity and excellence. The ideal candidates have a passion for care of under resourced and historically marginalized communities. This position is focused on reproductive and gynecological care in our ambulatory care clinic, with an emphasis on family planning. The ideal candidate should be able to provide comprehensive reproductive healthcare services to patients, including assessing family planning needs, counseling on all contraceptive methods (short acting, long acting, barrier and emergency contraception), performing physical exams including minor gynecologic procedures, educating patients on sexual health, prescribing contraception and inserting and removal of Long Acting Reversible Contraception (LARC) devices.

Academic appointment will be at Boston University Chobanian & Avedisian School of Medicine. Rank and salary will be commensurate to qualifications and experience. This position includes competitive compensation, benefits package, and CME allowance.

Why Boston Medical Center? Emphasizing community-based care, Boston Medical Center (BMC) is the largest safety-net hospital in New England and is committed to providing consistently excellent and accessible health services to all, regardless of insurance status or any other considerations. BMC has a strong focus on public health, both domestic and global, and a commitment to reproductive health demonstrated by recently renovated state of the art facilities. 30% of our current faculty identify as Underrepresented in Medicine (URiM) and 50% of our residents identify as URiM. The hospital serves as the primary teaching affiliate of the nationally ranked Boston University Chobanian & Avedisian School of Medicine, a world class research institution with more than \$250 million in research grants each year.

Emphasizing community-based care, Boston Medical Center (BMC) is the largest safety-net hospital in New England and is committed to providing consistently excellent and accessible health services to all. The hospital is also the primary teaching affiliate of the nationally ranked Boston University Chobanian & Avedisian School of Medicine. Boston University is a world class research institution with more that \$250 million in research grants each year.

BMC is more than a hospital. It is a network of support and care that touches the lives of hundreds of thousands of people in need each year. The institution has a strong focus on public health, both domestic and global, and a commitment to women's health demonstrated by the recent construction of a beautiful state-of-the-art labor and delivery, postpartum, and NICU

facility. There are over 3,000 deliveries per year at Boston Medical Center. Our OB-GYN ambulatory care clinic is a busy academic practice, with approximately 55,000 visits per year. We are a full service tertiary care service consisting of 37 physicians, 23 Certified Nurse Midwives, 8 Nurse Practitioners, 2 Physician Assistants, and 3 Genetic Counselors.

Our clinical services and research programs are focused on eliminating disparities in health care. Although this position has primarily clinical responsibilities; all faculty members are expected to participate in scholarly activities, medical student, resident, and fellow education, and research. We have a fully accredited OB/GYN residency program with five residents per year as well as a Complex Family Planning Fellowship.

Minimum qualifications:

- Applicants must possess an Advanced Practice Nursing Degree from an accredited College or University
- Applicants must have or be eligible to obtain a Massachusetts Advanced Practice Nursing License
- Gynecology practice and family planning clinical experience required
- Advanced knowledge of reproductive health, including contraceptive methods, menstrual cycles, and sexually transmitted infections
- Experience in insertion and removal of long acting contraception devices (IUD and implant)
- Expertise in performing pelvic exams and other relevant gynecological procedures including endometrial biopsy
- Strong communication skills to effectively counsel patients on family planning options
- Ability to interpret lab results and make informed clinical decisions
- Understanding of relevant healthcare regulations and guidelines related to family planning
- Able to diagnose appropriately during telehealth visits and offer in-person visits when needed
- Fluency with EHR and tele-health (EPIC preferred)
- Commitment to support RNs working 'at the top of their license'
- Fluency in languages other than English is highly desirable, but not required

Applicants must have the ability to work collegially within a diverse environment and demonstrate a commitment to our institutional values regarding diversity, equity, and inclusion. BIPOC (Black/Brown, Indigenous, and other People of Color) applicants are encouraged to apply.

BU conducts a background check on all final candidates for certain faculty and staff positions. The background check includes contacting the final candidate's current and previous employer(s) to ask whether, in the last seven years, there has been a substantiated finding of misconduct violating that employer's applicable sexual misconduct policies. To implement this process, the University requires a final candidate to complete and sign the form entitled "Authorization to Release Information" after execution of an offer letter.

Send CV and Cover Letter to: Carol Boudrot, Executive Assistant, Department of Obstetrics & Gynecology, Boston Medical Center, carol.boudrot@bmc.org
